

## **Royal Sovereign International Announces A Robust Line Up Of Calenders For Dye Sublimation Transfer And Heat Fixation.**

**Rockleigh, NJ-(Business Wire)-June 1, 2015** – Royal Sovereign International announces a unique solution for dye sublimation heat transfer. The NexxPress™ High Volume Production and InPress™ Standard Production Calendar Heat Transfer Systems are engineered for roll to roll, piece to roll and single piece production. The user friendly controls allows both novice and experienced users to achieve a roll to roll transfer rate up to 7.4 feet per minute at a 30 second exposure time.

“We are excited to be able to offer our valued customers a high quality dye sublimation transfer solution,” said Carl Hoffman, Director of Sales and Marketing. “The ease of use, fast speeds, and reliability will open new doors to those seeking a solution to their textile production needs.”

The NexxPress™ line offers the available options of a 14"Ø wide infra-red heated drum or a 14", 22" or 34"Ø traditional self-contained oil heated drum, each ensuring a smooth and even heat distribution. The included removable feed table allows for the easy transition between single piece production and full roll to roll transfer. The revolutionary shaft-less core adapters allows users to, quickly and effortlessly load supplies.

The InPress™ line of calender are designed for sign and print shops who are just starting out in the textile product market. Designed for roll to roll production but with the versatility to handling single piece production. Utilizing a 10"Ø infra-red or oil heated drum, vibrant and precise colors are transferred with perfection.

Drawing power from a dedicated 3 phase 240 volt line (customizable voltages available) the NexxPress™ and InPress™ Calender Heat Transfer Systems can achieve a maximum temperature up to 446° Fahrenheit. Customizable speed and temperature settings ensure an optimal color transfer is achieved every time. Royal Sovereign continues to offer a unique perspective and affordable solution for the print finishing industry.

The NexxPress™ and InPress™ Calender Heat Transfer System line are available for purchase now. For more information visit us at [www.royalsovereign.com](http://www.royalsovereign.com) .
